AMENDMENTS

IN THE CLAIMS:

Replace all previous versions of the pending claims with:

1. (Amended) A method of monitoring a consignment of goods including the following steps:
- measuring a predetermined parameter or parameters of said consignment using a disposable sender device attachable to said consignment;
 - transmitting a signal containing data representative of said measured parameter to a central location;
 - maintaining a database relating to said consignment at said central location, said database including said data representative of said measured parameters;
 - initializing said database to include consignment data for each consignment; and
 - providing secure communication access to said database to enable monitoring by enabled users of data available from said database.
